

# Every child has the potential to thrive.

Project Harmony recognizes the importance of supporting children's mental health in a positive and proactive manner. The Connections program brings therapists, schools, students and parents together to provide accessible, preventative mental health care to Omaha-area students in kindergarten through eighth grade.

## Collaboration

The heart of Connections is an active, engaged and supportive referral process so students with a mental health need can get the support they deserve. Based on the students' clinical needs and the therapists' expertise, Connections matches these students and their families with the most qualified mental health providers.

## World-Class Training

Training is provided by Project Harmony so all therapists involved in the Connections program are well-versed on evidence-based practices. Trainings include individual and group models to meet the specialized needs of students.

## Support

Connections takes care of ongoing engagement of families, case management and communications with schools so the therapist can concentrate on the clinical needs of the child. Connections also provides additional financial support for the therapist's training and compensates therapists for administrative responsibilities associated with the Connections program.
